## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group I**, claim(s) 1-4, 7-8 and 11-12, drawn to a method of producing a transgenic Gramineae plant comprising cocultivating transformed zygote with a feeder system.

**Group II**, claim(s) 1-3, 5 and 11-12, drawn to a method of producing a transgenic Gramineae plant comprising cocultivating transformed zygote with a culture of isolated immature pollen or pistils.

**Group III**, claim(s) 1-3, 6 and 11-12, drawn to a method of producing a transgenic Gramineae plant comprising cocultivating transformed zygote with a culture of androgenertically developing barley pollen or a culture of pistils or any combination thereof.

**Group IV**, claim(s) 1-3, 9 and 11-12, drawn to a method of producing a transgenic Gramineae plan without a selection marker.

**Group V**, claim(s) 1-3, 10 and 11-12, drawn to a method of producing a transgenic Gramineae plan without a selection marker without dedifferentiation of the zygote or zygote-derived embryo.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking the inventions of Groups I-V is a method of *Agrobacterium*-mediated transformation of Gramineae using isolated zygotes. However, this method is anticipated by Grimsley et al (U.S. Patent No. 5,569,597). Grimsley et al. teach a method of *Agrobacterium*-mediated transformation of Gramineae using isolated zygotes (claim 1, 21 and 37). Therefore this technical feature does not constitute a special technical feature as defined by PCT Rule 13.2, because it does not define a contribution over the prior art.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1638

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
